No: PMAR/JPR/2013-14/04

Dated: April 25, 2013

To,
The Chief Minister,
Government of Rajasthan,
Secretariat,
Jaipur

Sub : Humble submission for getting adequate opportunity to compete with outsourcing.

Honourable Sir,

As your kindness might be aware that our Association namely "Plastic Manufacturers' Association Rajasthan (PMAR)", Jaipur is an Association established for purpose of giving proper advice, guidance and welfare to the Plastic Manufacturing Units situated in the State of Rajasthan. The PMAR's intention is up-liftment of Rajasthan based Plastic Manufacturing Units.

In order to get the maximum thrust to the domestic industries, we humbly submit our plight in front of you and we are confident, you will kindly look into the matter seriously and take proper decision to get desired thrust to the domestic Industries erected in the State of Rajasthan.

As your kind self also aware that each and every development of every State directly or indirectly depends upon the industrial development of industries erected in the State. Every State has their own policy to get industrialization and introduced several stimulating programme like Financial Assistance, Subsidy for certain time period, Assistance of Infrastructure, Tax Rebate etc. Our Member Industries are having Plastic Processing Units and are depending on government policies and projects. The sale of entire products is depending upon the Government Projects and Orders.

The fact is that in the State of Rajasthan all the State Government urban based projects are coming through Rajasthan Urban Infrastructure Development Project (RUIDP). In this respect, we would mention here that as per our observations; we found that all purchasing of Water Supply/Sewerage related HDPE/PVC pipes through RUIDP are going outside State, which is very harmful and make the domestic industries in doldrums, which is definitely effect on the exchequer of the Statement Government.

We have come to know through some reliable sources that RUIDP categorically given verbal instruction to all contractors under their jurisdiction should purchase all pipes and related accessories from outside Rajasthan. The reason is that all PVC/HDPE Pipes Manufacturers in the State of Rajasthan are not having enough capacity and turnover to supply of the required material and quality also inferior. To improve the Turnover, all purchasing through outsourcing should be diverted in to the State, so that turnover can be improved substantially and money flow can be restricted within the State.

In this regard, we would like to inform you that all our members are ready to face all types of stringent ISI Quality norms as well as ready to agree third party inspection, these are the main quality norms stipulated by RUIDP. For your information as far as concerned of quality, you may please be kind enough to note that we are the superior than other States.

It is eminent to mention here that one way Government of Rajasthan insisting all Entrepreneurs/Industrialist to establish industry in the State of Rajasthan on the other hand State owned Autonomous body has been purchasing products through outsourcing, which will definitely weakened the mental strength of the Industrialist, who are put up the industry in the State and gradually all well established industries become sick and of course it will bad impact on our State as well increase the unemployment also.

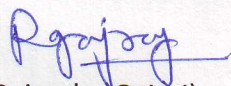

In such situation, we earnestly request your personal intervention to interfere the verbal decision taken by the RUIDP and give instruction to the concerned department to allow equal chance to the domestic industries also, so that our industry can also be showed their ability and quality consciousness.

We hope looking to the above fact; you kindly consider our request favorably and take necessary action for equality and equal chances.

Thanking you,

Yours truly,

For Plastic Manufacturers' Association Rajasthan.

(Rajendra Gajraj)
President
